

EAU VATION®

## Model No: EauVation Acqua 80T

EauVation's stylish Table Top Unit is the perfect option for replacing or complementing pre-bottled water in restaurants, bars, small hotels, care homes, offices, conferencing facilities and public sector establishments. The TT has a high performance ice-bank refrigerator capable of delivering large volumes of water at consistently low temperatures.

Simple plug and play design for ease of installation, connects to mains cold water supply and plugs into a standard 13 amp socket.

Supplied with built in water filter to provide premium quality tasting water. The unit requires connection to an external CO<sup>2</sup> cylinder, provided by gas suppliers and sited external to the unit within a cupboard or undercounter.

### Benefits

Instant still & sparking filtered water

Environmentally friendly

Personalised reusable glass bottles

Reduce costs & improve profits

EAU VATION®
