

EAU VATION®

Model No: EauVation Acqua 150i

EAU VATION's Large Remote water bottling system is the perfect option for when there is limited space on worktops or counters.

This compact system has been designed to fit perfectly under a bar or counter and supply premium quality, chilled, filtered water (still & sparkling) to a stylish bar tap.

The taps can also feature customer branding on the fish eyes and are designed to be located remotely from the system to allow for flexibility when space is at a premium.

The large remote unit is capable of producing 150L per/hrs

Benefits

Instant still & sparking filtered water

Environmentally friendly

Personalised reusable glass bottles

Reduce costs & improve profits
